# GP-T8621

2-Core FTTH Flip-Cover Wall Outlet

Application

- The Fiber Optic Hybrid Socket is a compact device designed for terminating, splicing, and storing fiber optic cables in indoor FTTH installations.
- It supports wall-mounted applications and integrates seamlessly with hard cables for reliable connectivity.

Key Features

- The hybrid socket supports termination, splicing, and storage functions for fiber optic cable systems to ensure efficient network performance.
- Its simple design provides enough workspace to arrange cables clearly for optimal management.
- The engineered fiber routing protects the bend radius through the unit to maintain signal integrity.
- This hybrid socket accommodates SC/APC adaptors, RJ45/RJ11 modules, and drop cables for versatile connectivity.
- The wall-mounted unit is specifically suitable for FTTH hard cable applications in residential or office settings.
- It features a durable plastic construction in RAL9001 color for a clean and professional appearance.
- The socket supports G.657 fiber storage with one SC adaptor and two RJ modules for flexible setup.
